Press release: Green Deal Certified Installer

AD Heating Ltd is pleased to announce that it has received certification as a Green Deal Installer for Biomass and Solar Thermal Systems.

The Green Deal is a Government Scheme set up to assist with funding the cost of energy efficient measures in the home – it enables people to take out a loan paid back via their electricity bill. Even if the loan is not required, people still need to get a Green Deal Assessment for accessing the Renewable Heat Premium Payment (RHPP) voucher, available to those who have installed a renewable heating technology.

Athol Duckett, Managing Director says: “AD Heating is keen to stay at the forefront of renewable technology installation, and by achieving this accreditation it will enable our customers to access finance and funding options that may not otherwise be available to them.”

About AD Heating Ltd:

AD Heating Ltd is an independent company established in 2008 that provides biomass boilers and solar thermal heating solutions across Scotland. The unique nature of AD Heating is to focus on technical competence rather than being driven by one specific product – this has enabled AD Heating to forge strong links with a wide range of manufacturers so that we can offer a comprehensive product range which allows us to specify the right wood-fuelled appliance for each individual situation. AD Heating’s belief in sustainable and renewable energy also extends to the peripheral equipment – offering novel and more efficient solutions.

About the Green Deal:

You can make energy-saving improvements to your home or business without having to pay all the costs up front through the Green Deal (<https://www.gov.uk/green-deal-energy-saving-measures>).

Energy-saving improvements include:

- insulation - eg loft or cavity wall insulation
- heating
- draught-proofing
- double glazing
- renewable energy technologies - eg solar panels or wind turbines

To find a Green Deal accredited assessor or installer use the Green Deal Oversight and Registration Body (GD ORB) (<http://www.greendealorb.co.uk/>)
